

Cloud Strategy

Redapt has been moving IT functions to the cloud since long before “cloud” became an industry term. We will help you develop or refine your cloud strategy, then migrate any or all of your IT services to a cloud-based delivery model.

WHAT WE DO

Assess: Through interviews, and architecture and application reviews, we arrive at a clear picture of your business requirements.

Design: Based on our experience, we identify and recommend the best hardware and cloud platform technologies for your particular business strategy. Our recommendations include a complete financial analysis to help you make the best possible business decision.

Implement: Our team can implement any or all parts of your cloud strategy, or support your IT group during in-house deployment.

BENEFITS OF WORKING WITH REDAPT

Maximum flexibility to deliver IT services on-premises, via the cloud, or in combination

Short, efficient assessment and planning phases

A phased cloud strategy to accommodate budget and resources

Technology fulfillment from well-established providers who excel at both vision and execution

Peace of mind that your transition to the cloud can occur with little disruption and built-in scalability for future growth

Reducing IT costs is just the starting point. The cloud will have an impact on innovation, customer responsiveness and revenue.

FOR EVERY CHALLENGE, THERE'S A SOLUTION

Our specialties have grown with the industry, moving from customizing hardware packages to designing entire data centers to assembling the right technologies for a wide range of IT initiatives.

Drawing on more than 15 years of experience, we solve almost any business problem and meet almost any IT challenge – physically or virtually, on-premises or in the cloud, with Redapt expertise or in partnership with your IT group.

We are confident we can help your organization with a customize solution to help you meet your business objectives while driving down overall IT costs and spend.
